

Why Rent From Us?

The Highest Quality Equipment: We only provide the safest and most reliable equipment on the market. Whether it is a concrete pump or mini excavator there is no expense spared in purchasing or maintaining our equipment to ensure our customers can rely on the equipment they rent.

Maintenance: Our Mechanics attend service schools from every manufacturer we work with. Having a team of capable mechanics whatever issue arises we can address and fix in a timely manner. By investing in our teams education, we invest in the safety of NY construction projects.

Safety First: Safety is our priority – Through maintenance, quality equipment and education of those that run our equipment as well as our customers we work to ensure those around the equipment you are rent are aware of potential risks and how to ensure their safety.

Fleet Size: Our Expansive fleet ensures customer's equipment needs are always met. From a small tow behind pump to a 65 Meter with 210' of reach, or a mini excavator up to a M316 - we are here to support your job no matter the size. In the event of a mechanical issue we always have a backup available to minimize time lost and help maintain efficiency on your project.

Mix Designs: Our Concrete Specialist is a wealth of information when it comes to mix designs. He has worked on the Ready Mix side designing the most difficult mixes we have ever pumped and now with us continuing to support your team with his knowledge of concrete as well as the equipment you rent.

WBE Certification: Our Rental Pumps is WBE certified with Empire State Development, NYC SBS and the Port Authority of NY and NJ – All rentals can work towards your MWBE Utilization plan.

Contractor Tips

Plan Ahead – For Success

- Have an open line of communication with our team about your equipment needs - we are here to help and constantly growing the fleet.
- Include your pump company in jobsite meetings to ensure your needs are met and your pours operate smoothly.
- Review Mix Designs with your sales person.
- Overhead Wires: EXTREMELY DANGEROUS - Do not set up or ask an operator to unfold the boom within 20 feet of any power lines. Call our sales team to determine a safe area to set up prior to the pour date.
- Do not unfold in Wind over 35 MPH makes or Lightning Storms.
- One to One Rule: For every foot of excavation depth, we require one foot setback from the hole for set up.
- Review hand signals with your operator before placing concrete.
